List View Exercises

After you have completed the notes on the list view control try these exercises

Activity 1.   Display stores

Create a web page with a list view on it. Configure the data source so that it will display the store name, address, city, state and zip.

- Display the store name in bold on its own line
- Display the address on 2 lines
- Display a horizontal rule between each store
- Set the total width to 300px
- Make sure you use a stylesheet to do this

Activity 3.

Create a web page with a list view on it. Configure the data source to select the publisher name and id.

- Display the publisher name as a link button.
- Don't display the publisher ID
- Set up your style sheet so that the selected publisher appears with a different background colour, or something that makes it stand out as the selected row (I added >> and changed the border colours).
- When a publisher is selected display all the titles for that publisher in another list view.
- Display the title, price (formatted as currency), type and date published (formatted as short date)

Activity 4.   Editing data

In this activity we will edit the data displayed.
